PROFESSIONAL SUMMARY

Senior SQA Engineer with 4+ years of product-based QA across **SaaS platforms, AI-powered products and eCommerce marketplaces**. Owns end-to-end quality for 8+ products at weDevs — leading QA for SaaS products and the flagship **Dokan** marketplace — from test strategy, risk-based planning and release sign-off to automation-first **E2E and REST API testing in Playwright + TypeScript** and load testing with **k6** and **JMeter**. Built a shared Page Object Model framework used across products, runs fast, reliable CI/CD on **GitHub Actions** and **Docker**, and brings **agentic AI into QA** with internal **Claude Skills** and **Claude Code** workflows for test design and bug reporting.

TECHNICAL SKILLS

Test Automation	Playwright (TypeScript/JavaScript), Appium, Page Object Model, data-driven & modular frameworks, sharding
QA Strategy & Ownership	Test strategy & planning, risk-based prioritization, quality gates, release sign-off, STLC / SDLC, triage & RCA
SaaS & AI Testing	SaaS dashboards, plan & billing enforcement, analytics & data integrity, AI chat / voice / try-on validation
AI / Agentic QA	Claude Code, custom Claude Skills, AI-assisted test design, exploratory testing & automated bug reporting
API & Performance	REST API, Postman, Swagger/OpenAPI contract & schema validation, auth checks · k6, JMeter load testing
CI/CD & Languages	GitHub Actions (caching, sharding, quality reporting), Docker, Git · TypeScript, JavaScript, Node.js
Testing Types	Functional, Regression, Integration, E2E, API, Performance, Mobile, UAT, Smoke, Sanity, Exploratory
Tools & Process	JIRA, TestRail, Postman Collections, automated reporting · Agile / Scrum

PROFESSIONAL EXPERIENCE

QA Engineer
March 2025 – Present
weDevs

- Lead automation for **Dokan, weDevs' flagship multi-vendor marketplace** — full **E2E and REST API suite** covering vendor onboarding, products, orders, checkout, payments, admin flows, and all Pro modules, plus mobile app testing.
- Own **end-to-end quality and release sign-off** across 8+ products; lead QA for the **StorePulse** suite — **CartPilot** (SaaS AI shopping assistant), **TryAura** (AI try-on plugin), and **StoreGrowth** — covering AI responses, plan & billing rules, dashboards, and data integrity.
- Maintain a shared **Page Object Model framework** in Playwright + TypeScript powering E2E and API suites for Dokan, StorePulse, **FlyCRM**, **weDocs**, and WP ERP.
- Drive **agentic-AI testing** with **Claude Skills** and **Claude Code** for test-case design, exploratory runs, and bug reporting.
- Validate REST APIs against **OpenAPI/Swagger** contracts; run **k6** and Playwright load tests to catch bottlenecks before release.
- Harden **GitHub Actions CI/CD** — E2E sharded across **12 parallel workers**, **Dockerized** environments, caching, HTML reports.

Software Quality Assurance Engineer
January 2023 – February 2025
Technohaven Company Ltd.

- Built **Playwright + TypeScript** frameworks from scratch with a **Page Object Model** architecture and shared libraries reused across projects.
- Developed cross-browser regression suites that replaced manual test passes on BEPZA, VATPROMPT, and ILO-GIZ.
- Owned the full QA lifecycle — planning, test design, execution, JIRA triage & **root-cause analysis**, and release sign-off in Agile Scrum.
- Ran **JMeter** load and **Appium** Android tests; built reusable Postman collections that standardized REST API testing.

QA Intern — Functional Testing
August 2022 – November 2022
a1qa

- Functional and regression testing for international web clients; wrote test cases, supported API testing, and tracked defects end to end.

KEY PRODUCTS & PROJECTS

- **CartPilot** (SaaS · AI) — AI shopping assistant (voice + text) with a SaaS dashboard; validated AI responses, cart accuracy, and billing.
- **StorePulse** — **StoreGrowth** & **TryAura** — eCommerce growth platform: upsells & BOGO offers, and AI virtual try-on; regression, dashboard, and data-integrity QA.
- **Dokan** & **Dokan Mobile App** (**flagship**) — weDevs' multi-vendor marketplace platform and Android app; led automation for core marketplace flows, payments, and Pro modules, plus mobile testing.
- **FlyCRM** & **weDocs** — CRM (contacts, deal pipelines, quotes & invoices) and a knowledge-base platform with an AI chatbot; functional, regression, and API coverage.
- **WP ERP** — HR / CRM / accounting suite; introduced its Playwright E2E/REST suite, replacing Codeception.
- **BEPZA Automation**, **VATPROMPT** & **ILO-GIZ** (Technohaven) — enterprise & government platforms; Playwright, API, JMeter, UAT.

SELECTED OPEN-SOURCE CONTRIBUTIONS

- **Dokan** — **Stripe Express payment E2E suite**, **redesigned admin-dashboard Playwright suite**, and **PDF-invoice E2E wiring**.
- **CI reliability** — **sharded E2E to 12 workers**, **pinned the test-env core**, **stabilized waits & fixed URL rot**, **upgraded the HTML quality report**.
- **WP ERP** — **introduced a Playwright E2E/REST suite, retiring Codeception** and **classified flaky tests correctly**. **Full list of merged PRs**.

EDUCATION

B.Sc. in Computer Science & Engineering — Major in Software Engineering
American International University-Bangladesh (AIUB)
